## PROFILE

Experienced, 32 years old IT specialist & freelance software engineer looking for challenging programming position, with a specialty in (robotic) process automation. That said, efficiency & productivity improvement wherever possible along with strong passion for self-development being my day-to-day motivation. Have worked in various international companies where cooperation among several other teams was a must. Honed soft skills such as problem solving which were crucial to deliver till the deadline.

## WORK EXPERIENCE

JAN 2021 - APR 2026

### Freelancer | Remote

Remote - Full remote

**Brief Description:** Full remote cooperation with various international companies, such as eBay and Avast. Worked mainly as a QA Engineer & Python Developer. Gained valuable experience which may be taken a good use of on a new project.

JAN 2020 - DEC 2020

### QA Engineer | Prague

NCR Corporation, Atlanta, Georgia - USA

**Brief Description:** Came up with several brand-new tests, refactored old ones & implemented various functions for proprietary point-of-sale test framework. Cooperation was suspended due to the COVID-19 lay-offs connected therewith.

AUG 2017 - JUL 2019

### DevOps & QA Engineer | Olomouc

Oriflame Cosmetics SA, Stockholm - SWEDEN

**Brief Description:** Collaborated with various teams to resolve client issues on a daily basis. Got rid of needless routines wherever possible thanks to automation. Created, optimized & refactored several functional tests in Selenium WebDriver.
